

FICHMAN FURNITURE & RADIATOR COVERS

MEASURING FOR QUARTER ROUND AND BASEBOARD MOLDING

Customer Name: _____

Room/Radiator: _____

MEASUREMENTS (in inches)

How thick in the baseboard molding at it's widest point? _____

How thick is the quarter round trim? _____

We will use these measurements to notch the radiator cover to fit your quarter round trim, and we will make the top's overhang on the back of the cover 1/8" of an inch deeper than the thickness of your baseboard to achieve the result shown in the diagram. If you only have baseboard and no quarter round, just fill in the thickness of your baseboard and write "N/A" for quarter round. Fax or email this form with your order.
